

Financial Proposal

Project: WhatsApp Auto Sender - EXE Development

Client: Mr. Mohamed Nashar

Prepared By: Mohamed Ibrahim Moselhy

Date: 13/03/2025

1. Project Overview

This proposal outlines the financial details for developing the WhatsApp Auto Sender as a standalone EXE application. The solution includes:

- Monitoring a specified folder for new files.
 - Automating file transmission via WhatsApp.
 - Ensuring user input blocking during execution.
 - Delivering a ready-to-use EXE file for easy deployment.
-

2. Cost Breakdown

Service	Description	Cost (USD)
Development	Custom coding and automation setup	\$500
Testing & QA	Ensuring reliability and functionality	\$100
Deployment & Documentation	Delivering EXE file with user guide	\$50
Support & Maintenance	1-month technical support	\$150
Total Cost		\$770

3. Discount & Final Pricing

As a valued client, we are pleased to offer a **60% discount** on the total cost.

Discount (60%): \$462

Final Price: \$308

4. Payment Terms

- **50% upfront** payment (\$154) before project initiation.
 - **50% upon completion** (\$154) after final delivery and approval.
 - Payment can be made via **bank transfer, PayPal, or any agreed method.**
-

5. Project Timeline

- **Development & Testing:** 7-10 business days.
 - **Final Delivery:** Within 2 business days after testing.
-

6. Deliverables

- Fully functional EXE application.
 - Configuration file for customization.
 - Installation and user guide.
 - Post-deployment support for one month.
-

7. Acceptance & Next Steps

If you agree to this proposal, please confirm by signing below. Development will begin upon receipt of the upfront payment.
